

NUTRITIONAL DEFICIENCIES

Could be the root cause of your health issues!

Research suggests that nutritional deficiencies may be at the root of many chronic conditions. The NutrEval can help identify specific, personalized recommendations for even the most difficult-to-treat patient cases.

Studies suggest that even a balanced diet may not provide all essential nutrients. The NutrEval test supplies vital information on your bodies nutritional needs by identifying nutritional deficiencies that may be associated with complex chronic conditions you may be suffering from. The unique features of the NutrEval report provide for easy interpretation and enhanced clinical utility:

Consider taking NutrEval test if you have concerns about :

- Mood Disorders
- Fatigue
- Digestive Complaints
- Chronic Pain/Inflammatory Conditions
- Cardiovascular Risk
- Weight Issues/Dietary Guidance
- General Health and Sports Fitness Optimization

Why NutrEval Test

- Interpretation At-A-Glance – this test comes with a report full of valuable information about the function of individual nutrients, causes and complications of their deficiencies, and their dietary sources
- Suggested Supplements – The report provides personalized recommendations for antioxidants, B-vitamins, minerals, essential fatty acids, digestive support, and amino acids.

Contact your clinician and request the NutrEval test today!
